PETITION FOR EXEMPTION FROM MAE 177

Students entering the undergraduate program in Aerospace, Civil, Environmental, or Mechanical Engineering who have previously taken a course in Engineering Drawing, either in high school or in college, may petition for an exemption from the MAE 177 requirement. If the petition is accepted, the student will not have to take MAE 177 and will not be required to replace the credit hours with another course. Please note: it is the student's responsibility to drop or resign from both the lecture and the lab if they no longer need the course.
