When it comes to ensuring our national security, UB SEAS is at the front.

The University at Buffalo School of Engineering and Applied Sciences (UB SEAS) is at the forefront of defense and homeland security. Our faculty and students are at the cutting edge of technology and research, working on cutting-edge projects in national security.

Our research focuses on developing innovative solutions that can help protect our nation from cyber threats, terrorism, and other forms of risk. We are committed to advancing the field of national security and ensuring the safety of our communities.

Our faculty and students are at the forefront of cutting-edge research in national security. We are working on projects that range from advanced technologies to novel approaches for protecting our nation's borders and transportation systems.

We are proud to be at the forefront of national security research and to be working on projects that can help protect our nation. We are committed to working with our partners in government and industry to ensure that our research is translating into real-world solutions.

Thank you for your support of our national security research. Together, we can make a difference in protecting our nation's security.
